

**article P211 palo/ bollard**

U-BOAT si ispira al periscopio dei sottomarini che scruta l'orizzonte, ma invece di solcare i mari rimane a terra per guidarci lungo i nostri sentieri. U-BOAT è disponibile con 1,2 o 3 luci, per illuminare in un'unica direzione o un'area più ampia. U-BOAT è calcato a mano con refrattari per esterno. I LED integrati hanno due possibili potenze e temperatura.

U-BOAT is inspired by the periscope of submarines that scan the horizon, but instead of sailing the seas it remained on land to act as a guide along our pathway. U-BOAT is available with 1,2 or 3 lights. to illuminate in a single direction or a larger area. Each U-BOAT is finely crafted in our outdoor refractories. Fired at a high temperature and hardened to be frost proof . The built-in LEDs have two possible powers and temperature.

**specifiche tecniche/ Technical data**

● **tipologia/ type**

pali/ bollard

● **ambiente/ environment**

outdoor

● **Certificazione/ certification**

EN CE   IP65

● **volume**

0,009 m3

● **peso netto/ nett wight**

2,7kg

● **tensione/ voltage**

24v

● **fonte luminosa/ light source**
